DESITE BIM 3.0.8

January, 12th 2023

Release Notes

IMPROVEMENTS & BUG FIXING:

- **Imports**

  - For IFC imports with IfcGridAxis defined as IfcCompositeCurve, this now working in DESITE.

- **Issues and Viewpoints**

  - The import of BCF files (for BCF version 2.1 and 3.0) now supports again the file extension *.bcfzip.

- **Bill of Quantity**

  - Javascript "Math" methods are now working correctly in "Quantity Take off rows"

- **Miscellaneous**

  - Fixed a bug that caused an application crash when moving an animation keyframe.

  - When creating a new Property Type, the name field is always empty and does not suggest the previously used name.

- **API**

  - Improved performance when creating objects inside a transaction, also while the object hierarchy is visible in the GUI.
