System Requirements

Version: 2021-04-09

thinkproject

1 DESITE BIM product family system requirements

The following system requirements apply to all applications of the DESITE line of products. Note that, while the given "minimum requirements" suffice to run the software, the performance will heavily depend on your projects' size. Hence, even the "recommended requirements" should be regarded as open-ended.

We suggest using two monitors when working with **DESITE md** or **DESITE md pro**, while the increased screen space facilitates the software use and navigation. General screen requirements are not applicable to the tablet-oriented **DESITE touch** application.

Regarding graphics hardware (GPU), we do not suggest or promote any specific hardware, other than it must support OpenGL. It is highly recommended, however, to install the specific graphics drivers provided by the manufacturer and keep them updated.

2 Minimum requirements

DESITE BIM

Operating System	Windows 8.1
CPU	64-bit
Memory	4 GB RAM
Graphics Hardware	OpenGL compatible GPU
Screen resolution	1920 x 1080 Full HD

3 Recommended requirements

thinkproject

DESITE BIM

Operating System	Windows 10
CPU	64-bit
Memory	16 GB RAM
Graphics Hardware	OpenGL compatible GPU
Screen resolution	2560 x 1600
Screen size	30"

**Together, we construct
a better world**
