Setup

Version: 2020-11-24

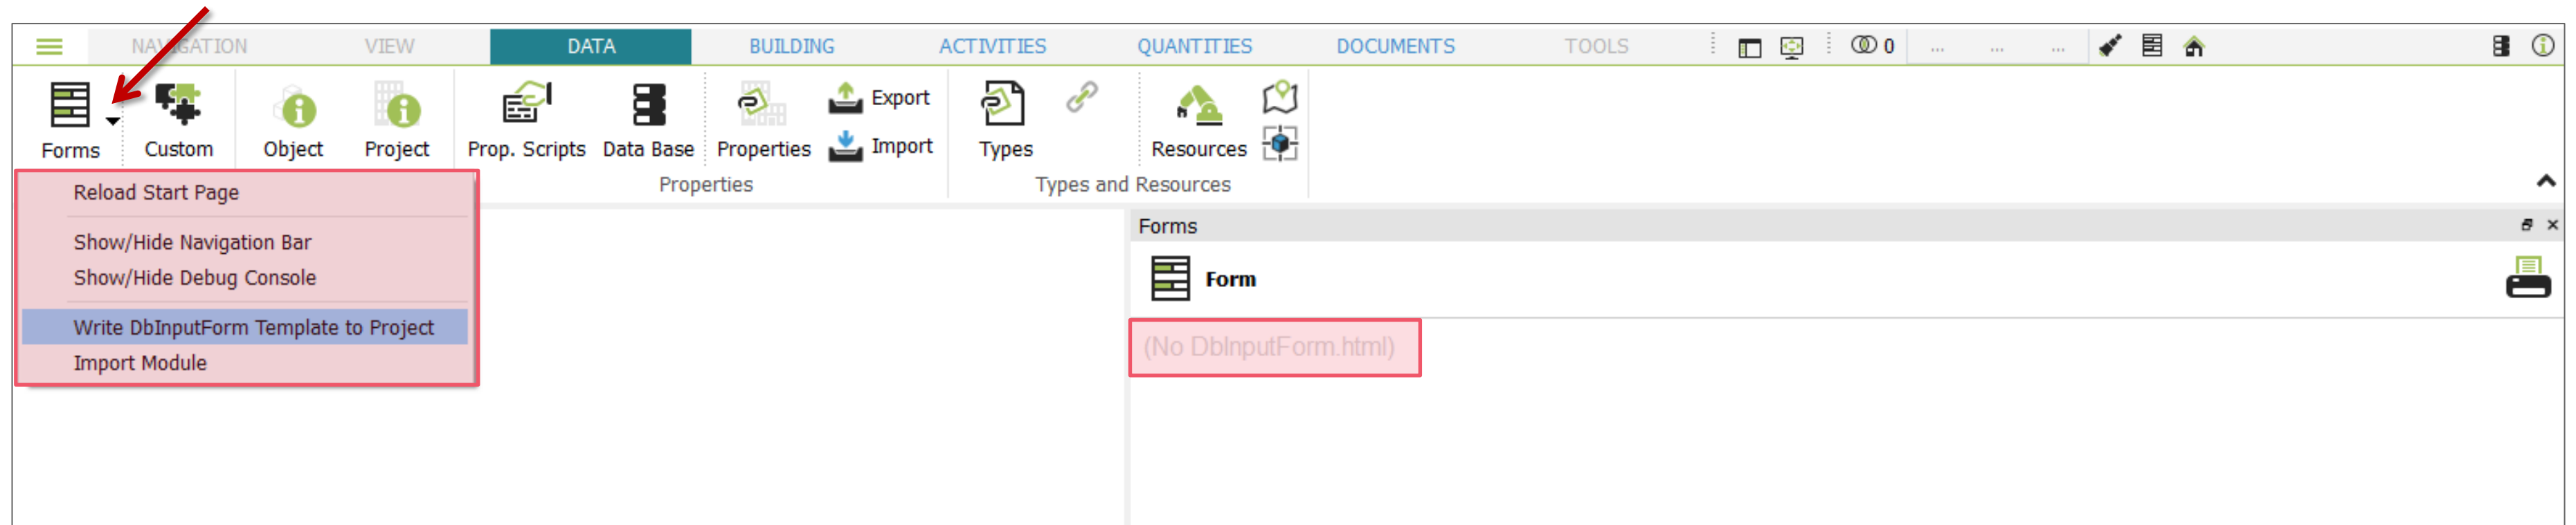

thinkproject

A decorative graphic on the right side of the slide. It consists of several overlapping, slanted rectangular bars. The top bar is bright green, the middle bar is a dark teal, and the bottom bar is a slightly lighter teal. They are arranged in a way that creates a sense of depth and movement, starting from the bottom left and extending towards the top right.

Table of Contents

1. Create DBInputForm
2. Import tpCDE Connect for DESITE BIM

1 Create DBInputForm

To setup the webform and the tpCDE Connect for DESITE BIM module in a New (empty) Project, you have to create a DBInputForm first. The message in the Forms module indicates, if there is already a DBInput Form or not.

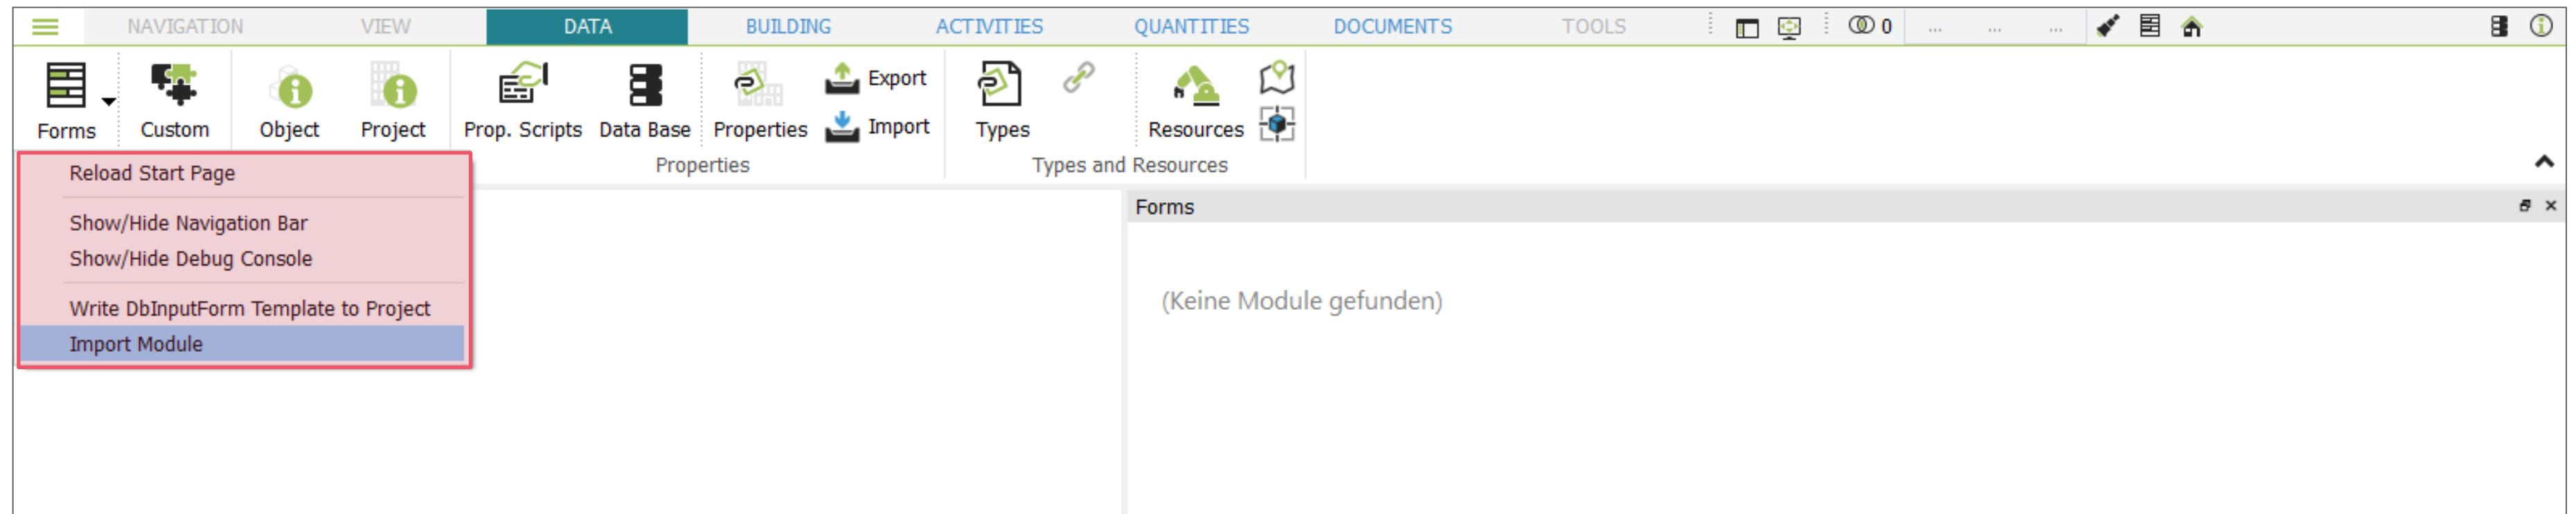

Go to the **DATA** module and click on the **Forms** drop down menu. By clicking **Write DBInputForm Template to Project** the respective file will be created in the project folder.

Note:
Before you can create the DBInputForm template you have to save your project.

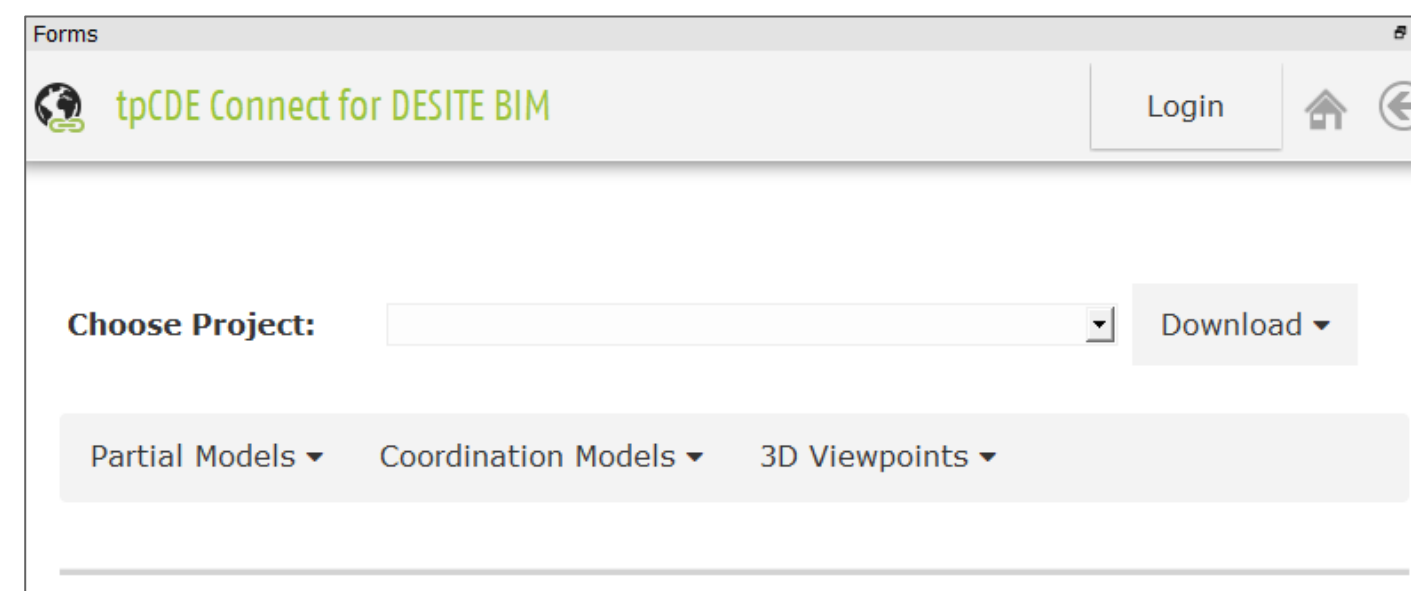

2 Import tpCDE Connect for DESITE BIM

To import the Connect module click on the **Forms** drop down menu. By clicking **Import Module** please open the respective file **tpCDE Connect for DESITE BIM.module.zip** to import the Webform. The module will be imported and saved into your project.

To open the Webform just click on the two arrows on the right hand side of the form.

**Together, we construct
a better world**
